Professional summary

Fourth-year B.E. Computer Science and Engineering student with an 8.5/10 CGPA. Builds full-stack applications with TypeScript, React, Node.js, and PostgreSQL. Project experience includes real-time collaboration, offline synchronization, REST APIs, authentication, and automated testing. Seeking graduate software engineering roles.

Education

Chandigarh University, Mohali, India — Expected May 2027
Bachelor of Engineering (B.E.), Computer Science and Engineering — CGPA: 8.5/10
Silver Bells Public School — Class XII: 90.2%; Class X: 93.8%

Technical skills

Languages: C++, Python, JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication
Databases: PostgreSQL, MySQL, MongoDB, Redis, Prisma
Tools and testing: Git, GitHub, Docker, Postman, Linux, Vercel, Render, Jest, Playwright
Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Projects

SyncSave | Real-time collaborative editor github.com/yashgoel-749/SyncSave
TypeScript, Next.js, Node.js, Yjs, WebSockets, PostgreSQL, Prisma

- Built a collaborative rich-text editor and shared whiteboard with Yjs CRDTs, live cursors, and WebSocket synchronization for concurrent editing.
- Added offline editing with IndexedDB and incremental synchronization on reconnect; persisted document state in PostgreSQL using debounced, sequential writes.
- Enforced role-based access control for owners, editors, and viewers at the WebSocket layer, with live access revocation, origin checks, and message rate limiting.

LinkFlow | URL shortener and analytics github.com/yashgoel-749/linkflow
TypeScript, React, Express.js, PostgreSQL, Prisma, Redis, Playwright

- Developed URL management with custom aliases, expiration, password-protected redirects, QR codes, and click analytics backed by PostgreSQL.
- Integrated Redis routing caches with database fallback and cache invalidation; added JWT-based HttpOnly sessions, ownership checks, and Zod request validation.
- Added backend integration and Playwright browser tests for authentication, link lifecycle, redirects, and analytics; documented REST endpoints with Swagger.

Amazon Clone | Full-stack e-commerce github.com/yashgoel-749/clone
Next.js, React, Node.js, Express.js, PostgreSQL, JWT, Vercel

- Built a responsive storefront with product search, category browsing, persistent cart, wishlist, simulated checkout, and order history.
- Implemented Express REST APIs and PostgreSQL storage for users, products, carts, addresses, and orders; integrated Google sign-in and JWT authentication.
- Managed cart, authentication, and wishlist state with React Context; deployed the responsive Next.js storefront on Vercel.

Achievements

- 2nd Runner-up, Hackshastra 2.0 national-level hackathon; 1st Runner-up, Technicia ’25 hackathon.
- Top 5, Aptitude Wizard Season 22 among 200+ participants.
- Solved 300+ DSA problems across LeetCode, Codeforces, and GeeksforGeeks.

Certifications

HackerRank: Data Structures and Algorithms (Intermediate), SQL (Intermediate)
NPTEL: Cloud Computing, IIT Kharagpur
